## PROJECTS

### Blood Bank System, August 2020 - November 2020

- We design a website for organization to online Blood Bank System. The entire project has been developed keeping in view of the distributed client server computing technology, in mind. The project has been planned to be having the view of distributed architecture, with centralized storage of the database. Admin is the main authority who can do addition, deletion, and modification if required.

### Online Compiler, September 2018 - March 2019

- Online compiler system is used in our home, office, College system. This system can provide a security to private network. This system can block the unauthorized users in school, college, office. In future this application would be work for all programming languages like Java, Python and Php. Develop the project using this application. Its being used quite a lot in the above mentioned areas.
